

Risk

Methodology

We begin to categorize what you want the organisation wants to protect into five foundational layers:

We mitigate risks from five pillars below that can affect the five foundational layers.

MEDICAL RISK

Medical training for staff (business, family office, estates etc.). Eg: advising on medical equipment and its storage and location. Full health checks

PHYSICAL RISK

The structure, design and equipment used to secure people and places.
Eg:
Office Security
Visitor Protocol
Executive Protection

TRAVEL RISK

Pre-travel threat assessments, travel booking service, centralized 24/7 location monitoring, medical support, evacuation plans, secure driver services.

CYBER, DIGITAL/ TECHNOLOGY RISK

Cyber security, networking and cloud best practices.

Design and implementation of systems

BESPOKE RISK

This involves risks that do not fall entirely into another category. Eg:
Geo-political
Strategic Competitors
Media / Reputation
Addiction
Trusted Insider
Philanthropic Projects
