PRIVACY AT HOME: IMPLEMENTING BEST PRACTICE

THE SITUATION

Modern homes are filled with interconnected devices - from Wi-Fi routers and smart fridges to streaming boxes, voice assistants, and security cameras. When these share a single network, a single weak point can compromise the whole environment - exposing sensitive data, live feeds, or family routines.

THE CRISIS24 PSG SOLUTION

Crisis24 PSG delivers a tailored family engagement program combining a residential network assessment and digital-safety training:

- Review of the home network and IoT devices, moving vulnerable systems onto a segregated network.
- Implementation of quick wins (router lockdown, IoT segregation, encryption of camera feeds) with a 30/60/90-day remediation roadmap for more complex fixes.
- Provide role-specific guidance: parents receive governance and strategy options; children learn practical safe-use habits through live demos and story-based training.
- Introduce a “Family Online Safety Agreement” - turning technical rules into shared values across generations.
- Deliver device-hardening playbooks (MFA, VPN, backups, MDM) and digital hygiene practices for travel and everyday use.

OUTCOME

The family gains peace of mind, knowing their most sensitive data and home systems are secure, while children and staff develop practical awareness of how to stay safe online.
